Iphone	I bought the iPhone at 09:41 as Apple likes	3000	1	electronics	1/22/2023

Total Expenses For The Selected Date: 3070.00

## The essence of the web app

### Background

We work every month constantly and we know our monthly income, but we don't always know how much we spend every month.

This is why quite a few people sometimes find that their bank account is in debt, without them expecting it at all.

Those people wonder how it is possible to avoid such a situation and end the month with obligation? The answer to this is quite simple, to track expenses - or as we call it - "Spent It Right"!

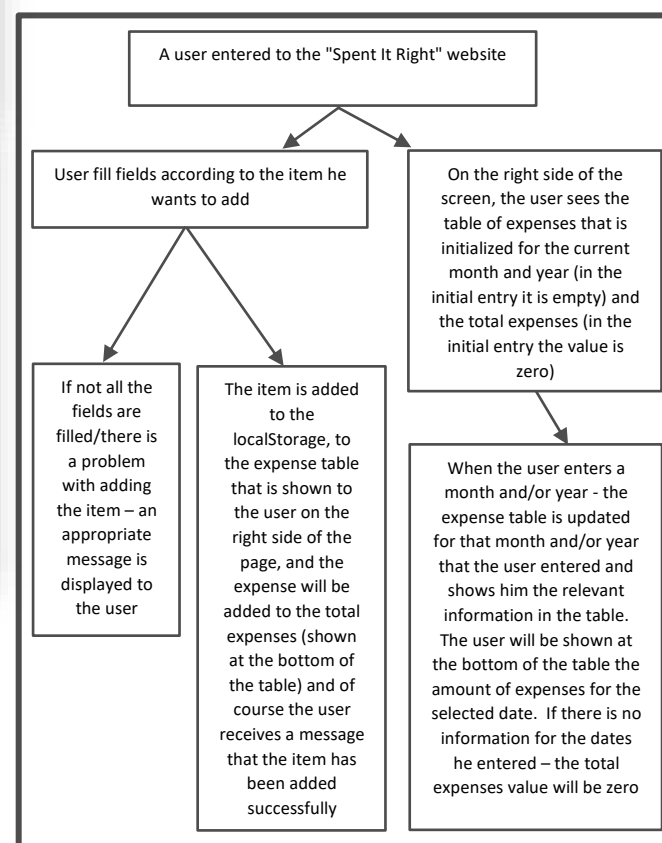

### Target

Managing expenses in a visually organized way.

Track past expenses.

An expense report is available for each month and/or year!
